

## ELECTRICAL VALVE ACTUATOR (EVA)

SubC Solutions has designed subsea Electrical Valve Actuators for both permanent and ROV retrievable installation. Torque range from 25 Nm to 3000 Nm. Higher or lower torque on request.

Electronics are Q1 qualified in accordance with API-17F. EVA qualification testing including PR-2 testing, endurance testing, hyperbaric testing and 2600 cycle long-life testing.

EVA is available both with battery and super-capacitor packs for failsafe operation and power boost. Functionality includes open/close and choke operation with auto homing and position memory at power loss. Can be configured for multiturn and 90 degrees operation for different valve types.

Flexible control interface with Modbus, Ethernet, serial and CANbus communication. Optional current loop or digital ON/OFF control available.
